

To Whom It May Concern,

This special person I will tell you about is a wife, a mother of two boys and has been with Bay County schools system since 2007. Her mother, has been teaching now over 40 years between Leon, Bay and now Jackson County, so she has seen the kind of dedication it takes first hand. Christie is so passionate about her students' education and has excelled at each step throughout her early career. She's taught elementary 10 years and almost 2 years in her new role as an Assistant Administrator. We have 2 boys ages 5 and 7 that go to school with her each school day so mornings can be eventful, to say the least. She never complains just gets it done daily. I could tell you all the things she does from doctor visits, to keeping a household running, to being there for Bozeman students and applying procedures with her colleagues to improve on students' education, but it wouldn't cover all she does daily. She is the most deserving person I know, she deserves the world but would be blown away if she were to win this amazing gift the Eye Center of Northwest Florida and Panhandle Educators Federal Credit Union is giving away. I appreciate your consideration and time.
